The only bioabsorbable subcuticular skin closure device for short and minimally invasive incisions

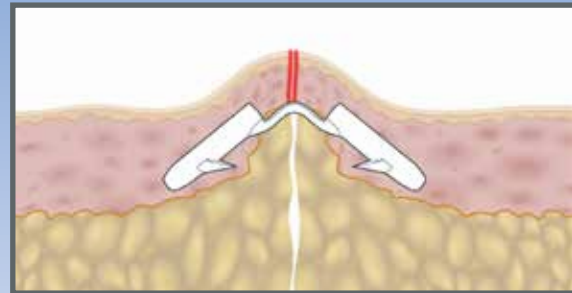

SubQ It! Fastener and standard surgical staple comparison

SubQ It! Flexible fastener

Set Back Dermal Technique with Suture

Set Back Dermal Technique with SubQ it! Fastener

## Advantages of Sub-It! closures

- Significantly faster than manual subcuticular stitches
- Eliminates needle accidents and knot tying
- Uses set-back technique shown to give superior eversion, reduce spitting sutures and improve cosmesis
- Bioabsorbable - no need to remove stitches or metal staples
